

RECALLED Formicprotect

The Formicprotect used in this study was part of a batch (22-304-1) that was subject to a voluntary recall by the manufacturer on August 30, 2023 due to a defect that prevented the strips from properly releasing formic acid. The reported efficacy is not consistent with the results of any other published efficacy study with Formicprotect (registered as Formic Pro, Formicpro, and MAQS+ in other markets).

Z poważaniem dr hab. Dariusz Gerula prof. IO
